CASTING COPPER 151/8

A decided improvement is noticeable today in the tone of the stock market, Not only was business decidedly better but prices on the whole show slight advances over those quoted for the past few days. There are some exceptions, but even they show no material depreciation or change.

Daly West was traded in at 12.10, and Mammoth shows hardly as much strength today. Grand Central was much stronger, being traded in at

Eagle and Blue Bell was brought out on a bid of 1.20, while Ajax responded at 481/2 and Chloride Point at 18.

Mercur brought 5.25 at the outset, but weakened to 5.2214 before the close of call. Northern Light made slight gains from 74 to 7%, while Omaha was flat at 1.

Yankee Consolidated was stronger at 12, Joe Bowers commanded 9 and Bowers Extension sold for 5.

Martha Washington changed hands at 31/2, while Sunbeam went at 431/2. Golden Eagle was handed out at 21/2 with a 1 cent assessment due next week. Kremlin was bought for 2,

WAS SHOW OF ANIMATION ELEVEN CARS

Speculation Took on a Strong Tone in Wall Street Today.

Brief Period of Life, then Relapse Into Former Duliness - Live Stock Steady - Produce Drops.

New York, Jan. 20 .- Wall Street: The market opened with considerable show of animation and strength, ignoring the lower quotations cabled from London. Speculation took on a strong tone throughout and was very broad. The metal stocks led in the rise and improved from 1 to 3%, under the leadership of steel and wire. Some of the railroads were taken freely. Realizing caused a return to the recent dullness, there being little stock offered on the decline. Losses were limited to fractions, and towards midday the trading became more lively on buying of the coalers, and prices improved. Reading

first preferred rose 2½ points. Sugar was pushed up to 121 after 2 o'clock, but reacted on profit-taking. Lackawanna extended its rise from the owest to 61/2 points. Pittsburg C. St. L. dropped an extreme 114, and railied 34. The general list receded slightly from top figures, but offerings were not large. There was a good absorbed to the state of the were not large. There was a good absorption at the lower level, and the market rallied. The closing was ac-tive and strong, with notable gains

The bond market showed strength on a moderate demand.

Charles Read, accused of stealing a suit of clothes from a clothing store, pleaded guilty to the charge—by way of extenuation he said he had lain in the city jail for 30 days and was covered with all sorts of animal creation. ered with all sorts of animal creation. He was given 50 days imprisonment to think over his iniquity,

OF PIC COPPER

Represents the Production of Highland Boy for Month.

ORE FROM LOWER MAMMOTH

Shows Native Silver - Ogden Onyx-Strike in the Copper Glance.

Eleven cars of pig copper in one month may not seem an extraordinary output to those acquainted with the shipments from the big copper producers of the world, but eleven cars of cop. per from a Utah mine in a month is cause for congratulation, as the copper industry is comparatively new in Utah. The above shipments, weighing approximately 661,000 pounds, have gone to the refinery at Perth Amboy, New Jersey, during the present month, and there is a possibility, said Manager Poland today, that the number may be increased to 12 cars, or over 720,000 pounds by tomorrow. No estimate can be formed of the value of such shipments. Though the pig copper is known to carry gold and other metals, the relative amount of each is kept a profound secret. It has been stated that preparations are being made to double the output of the smelter in the spring, and every assurance is expressed by those who have visited the mine that the property can easily stand the drain on its ore reserves that an increased smelter capacity will necessitate. President A. C. Burrage of the Utah Consolidated, or Highland Boy as it is known at home, was expected to arrive from Butte today on a tour of inspection. It is said he has not visited the property since the smelter was put in commis-sion and it is thought his present visit has some connection with the proposed smelter enlargement.

THE LOWER MAMMOTH. Two Chutes of Ore Eight Feet Wide

-Native Silver.

James Chipman brought to town some fine looking samples of ore from the Lower Mammoth, which he visited a day or two ago .The samples were obtained from 2 chutes of ore on drifts off the 600 level, which are said to be 8 feet across. One of the samples shows besides copper values, some striking effects in native silver, and closely resembles, it is said, some of the ore at one time marketed from the Grand "A winze has been run down about 25 feet from the drift on the 600 level, and the ore chutes have been reached by a short drift from the winze It is now proposed to stope on the vein and ascertain the extent of the chute, after which an incline may be run down on the vein. Some shipments are promised shortly and when developments warrants it the main shaft will be continued deeper and a drift run to the ore chute at a still greater depth.

BUNKER HILL ORE.

High Grade Galena in An Upraise from the 200 Level.

Private assays obtained from samples Private assays obtained from samples of Bunker Hill galena ore show as high as 74.6 per cent lead, 34 ounces silver and \$2.40 in gold per ton. The carbonate ore assays 60.8 per cent lead, 19.3 ounces silver and \$1 in gold per ton.

A. L. Jacobs, who visited the mine yesterday, says that there is some ore in the bins and a three-foot vein has been opened up in the west drift in a stope from the 200 level. There is every indication that the chute now beevery indication that the chute now being worked on is identical with the one on the 150 level, from which ore has been shipped.

THE GIPSY BLAIR. Rock Showing Metallic Values Found at a Depth of 160 Feet.

The contractors who are sinking the shaft 200 feet deeper on the Gipsy Blair property at Alta came down from that camp yesterday afternoon, They brought to town some fine looking samples of quartz and lime formation showing metallic values. It is stated that over two feet of the rock exists in the bottom of the shaft, besides a foot of loose vein matter which shows chloride of silver. The indications are said to be more favorable than ever that the property will make a mine. Ben D. Luce will go up to Alta in a day or two to examine the new conditions at the property.

COPPER GLANCE STRIKE.

A Foot of Ore Which Assays Well in Lead and Gold.

Some very good ore is reported to ave been uncovered in the Copper Glance property in Bingham a few days ago. Barlow Ferguson, when seen today, stated that a foot of ore has been opened up which assays as high as 52 per cent lead and \$6.40 in gold per ton, with some silver. The strike occurred in the tunnel about 300 feet from the entrance. The Copper Glance is neigh-bor to the Congor and contains about 70 acres of ground for which a patent is now being sought.

SOLD AT AUCTION.

Group of Nine Patented Claims Transferred for \$5,000.

Sheriff Haycock sold at auction last Monday the group, consisting of nine patented mining claims, belonging to the American Antimony Mining company to W. C. Staines for the sum of five thousand dollars, says the Pauguitch Progress. These claims are situated in the Antimony mining dis-trict, Garfield county. For a long time they have been laying idle, but it is thought since the advance in the price of antimony that these were can be made to pay. We understand that the purchaser will place on the property some improved mining machinery and make a thorough test as to whether or not they can be worked with profit. Most of the ore is of a low grade, and must be concentrated before it can be disposed of.

THE SHARP MINE.

A Shipment is Promised Within the Next Ten Days.

The report that three feet of good ore had been encountered in the property of the Sharp Mining company in Stock-ton was confirmed today by A. L. Ja-cobs, who visited the mine yesterday. The tunnel encountered the ledge at a distance of 350 feet from the entrance,

and an upraise on the vein has exposed a fine vein of oxide and sulphide of lead. Assays from samples of the former show 38,8 per cent lead, 23.8 ounces silver and \$2.40 in gold per ton. The sample of sulphide ore assays 53.2 per cent lead, 16 ounces silver and \$2.20 in gold to the ton. A new car track is being laid preparatory to starting shipments on the way. One or two caroads of ore are promised within the next ten days.

TRINIDAD CONTRACT.

One Handred Feet More of Shaftwork Will be Completed.

a meeting of the Trinidad Mining and Milling company held last evening a contract was let for 100 feet of shaft work. The shaft is now down 175 feet, and the contractor who is working on it reports that there is every indication that values will be encountered before the new contract is finished. The property joins the Sir Victor in the south of Sunshine,

FINE ONYX NEAR OGDEN. Number of Tests Show it to be Su-

perior to Mexican Onyx. A correspondent of the Salt Lake Min-

ng Heview writes as follows concernog Oguen onyx:

About twenty miles north of Ogden City there is an extensive onyx de-deposit owned by Ogden men, which is, undoubtedly, one of the finest deposits in the United States. The owners have done over \$2,500 worth of development work on the property, but none of the material has ever been put on the market owing to the lack of means by the owners to procure the necessary ma-chinery for sawing and polishing the product. Now, however, a company is being organized to develop the property and saw and polish the onyx for the market. The stock of this company is being taken largely by Ogden men, and it is expected that a mill will be in operation by the first of May.

The onyx has been tested by the United States treasury department at the Watertown arsenal, and pronounced entirely satisfactory. Tests of the material have also been made by the experts of several of the eastern wholesale onyx and marble houses and their reports are unanimous to the effect that the Ogden onyx is superior to the Mexican onyx in texture and quality.

Another decided advantage which the Ogden onyx has is that it is quarried in sizes which saw up into slabs 2x5 feet and even larger without flaws or holes. The coloring is varied and rich and the markings and tracings deli-cate and beautiful. Many onyx ex-perts who have seen the display, which is on exhibition in the law office of A. B. Hayes, pronounce it as beautiful as any they have ever seen.

THE DALTON MEETING.

Company's Receipts More Than Its Disbursements-Officers Elected.

The shareholders of the Dalton Mining company of Marysvale met in annual session yesterday afternoon and listened to a report which showed that \$8,659.32 had been received during the year and \$6,124.89 expended, thus leaving a balance of \$2,534.52 with which to continue the work of prospecting. Some high grade ore has been raised during year, and with freedom from indebtedness the outlook for the company is considered satisfactory. Arrangements will be made shortly to in-stall a whim and when this is done sinking will be resumed in the shaft and one of the tunnels will be pushed further in. The following directors were elected to serve for the current year:

B. A. McMillan, A. H. Adkinson, J. H. Larkin, J. C. De Kalb, C. H. Dowse, O. R. Young and Dr. C. M. Garrison. Mr. McMillan was made president when the board organized. Mr. Larkin is vice president; Mr. Adkinson, treasurer, and Dr. Garrison, secretary Young continues to act as managing director.

Paulsen Claims Sold.

The interests of the Home Copper The interests of the Home Copper Mining company in the property known as the Paulsen claims, were on yesterday transferred to the corporation known as the Big Creek Copper company, now operating on Big Creek near the southern border of Carbon county. Messrs. W. P. Barbour and J. J. Messrs. W. P. Barbour and J. J. Henry, the purchasers of the Electric Light company and the Dillon coal mine, are the financiers of the Big Creek company. The Big Creek company assumes the

315,000 bond and lease taken by the Home company from Mr. Paulsen, and in addition reimburses the Home company for all moneys expended in development work, the purchase of sup-

piles, etc.

Mr. Barbour has been here several days making the deal, and this morning he took formal possession of the property, and the work of developing the mine will be continued as rapidly as possible. Shipments of iron ore will be continued as development progresses.—Rawlins, (Wyo.), Republican. MINING NOTES.

The St. George smelter is expected to

start up shortly. The Swansea of Tintic marketed three cars of ore today.

The Horn Silver of Frisco had a car of ore on the market today.

The Utah of Fish Springs had a car of ore on the market today.

Two cars of ore from the Mammoth of Tintic were on the market today. A car of ore from the Croesus mine at Hailey, Idaho, was on the market to-

Glen R. Bothwell is visiting the Sacramento today in company with Mr, Conaughy.

The lessees on United States property reported on the market today with four

The annual meeting of the Mercur Mining company, is booked for tomor-A car of ore was on the market today from the Buckhorn property in Deep

Creek district. It is expected that the Swansea directors will meet tomorrow and declare a dividend of \$5,000, as usual.

A recent assay of iron ore from the Brigham City copper and slate proper-ty shows 51 per cent iron.

The Taylor-Brunton sampler reported four cars of ore from Bingham, one from Idaho and one from Frisco. Two cars of Red Wing concentrates

have been shipped this week. The mill is said to be running very smoothly. F. E. Wilson went out to Stockton to-day to look over the Bunker Hill, in which some fine galena has been opened

The Conklin sampler reported five cars of ore from Tintic, one from Fish Springs and one from Deep Creek to-

Ten men are working on the York property at Bingham. Work is being pushed on three tunnels but as yet no values have been encountered. The last issue of the Salt Lake Mining Review is to hand with some im-provements in its make up and an illus-trated description of the Chloride Point

It is said that development now in progress in the O'Kanogan mine in Washington demonstrates the fact that the veins carry free gold to a depth of 1,000 feet and that practically the same conditions prevail as in the surface

White Pine Naws: A partial clean-up

at the Chinaman mili this week dem-onstrated beyond a doubt that the present method of treatment is the one particularly adapted to the ore, the returns tallying with the ascay value of the ore. The outlook for a boom in the mining industry in that county the current year is highly flattering.

Denver Mining Reporter: Big results of mining and ore treatment under the cyanide treatment are of daily record in Utah. On Tuesday of last week, as the result of one day's work at the Consolidated Kansas City Smelting and Refining company's works, cyanides were unloaded from the Lucky Boy, 200 pounds, the Sacramento company 700, and the Chinaman 100 pounds, the value of the day's receipts being \$25,000.

Rawlins (Wyo.) Journal: Mr. C. E. Knapp, president of the Kurtz Chatterton Mining company, was in the city the first of the week. He was accomthe first of the week. He was accom-panied by Manager Adams of the company and Mr. Best, a Chicago capitalist, who is largely interested in the company, and together they paid a visit to the mines and made a thor-ough examination of the property, They put surveyors at work to lay out the most suitable location for the concentrator and matting plant, which will be in operation as soon as it can be transported to the mines.

Hailey (Idaho) Times: It is reported, on what seems to be good authority, that Hugh Bradford, who has had charge of the Minnie Moore property since operations there were discontinued, has received a letter from Thomas Carmichael of London and New York, ordering him to turn the property over, on demand, to the representatives of the new owners, the property having changed hands. The new company will, it is said, purchase the Pacific tunnel, which adjoins the Minnie Moore group, and begin work as soon as the tuned is secured. It has \$25,000 in the treasury, to be used as working capital.

PLATS RECEIVED.

Desert Land That Will be Open for Entry After Feb. 23.

Register Frank D. Hobbs and Receiver George A. Smith have issued the following: "To whom it may concern:-Notice is hereby given that the following township plats (full and fractional) have been received at this office from the United States surveyor general for Utah, viz.: Township 12 S., Range 8 E.; township 15 S., range 11 E.; township 16 S., range 10 E.; township 16 S., range 11

Said plats will be filed in this office and opened for entry under the public land laws on and after February 23,

GOOD NAME. GOOD TRAIN.

A year ago last February when we placed a new Chicago-Denver train in service, we christened it "The Chicago Special." The name fits it perfectly. Special." The name fits it perfectly. Special." The name fits it perfectly. In the first place, it is a CHICAGO train. Then again, it is a SPECIAL train. The running time is special—train. The running time is special—train. 1.046 miles in less than 28½ hours. The equipment is special—sleeping, library, dining, and chair cars. The service is special-as good as any in the world. Leave Denver on the superb train at 2:50 this afternoon, and tomorrow morning you are in Omaha or St.

Tickets at offices of connecting lines. Ticket Office, 214 S. W. Temple Street. Salt Lake City.

Joseph, tomorrow evening in Chicago

or St. Louis.
